4

Subject Index of Volume 84

Absorption coefficients
absorption coefficients for the fluorosulphate radical, 101
Acetylene
photocatalytic reduction of acetylene by $[MoOCl(dppe)_2]^+Cl^-$ on TiO_2, 73
Acidity
excited state acidity of bifunctional molecules. 4: General solution of lifetimes in systems with three coupled species, 139
Acrylate polymerization
photoinitiation of acrylate polymerization by 2-methyl-1-[4-(methylthio)phenyl]-2-morpholino-propan-1-one: some effects of the morpholino substituent, 291
Adsorption
photophysical processes of pyrene adsorbed onto porous glasses. Importance of evacuation temperature, 283
Alkyl cinnamates
the use of alkyl cinnamates as UV screens for preventing the photo-yellowing of lignin-rich pulps, 317
Aminium cations
deprotonation of aminium cations — a CIDNP study of relative group reactivities, 1
6-Amino-coumarin
the effect of pressure on the luminescence of the flexible dye molecule 6-amino-coumarin in four solid polymeric media, 203

Barium(II) and lead(II) 2,4-dinitrostilbene-4′-monoaza-18-crown-6 complexes
photochemistry of barium(II) and lead(II) 2,4-dinitro-stilbene-4′-monoaza-18-crown-6 complexes, 227
Benzophenone
insoluble polymeric benzophenone: surface photophysical studies using diffuse-reflectance laser-flash photolysis (DRLFP), 279
Benzylchlorocarbene
1,2-H shift in benzylchlorocarbene: isotope effect and influence of the solvent, 133
2,2′-Bipyridine
the effects of conformation and coordination to zinc(II) ions on the luminescence properties of 2,2′-bipyridine, methyl-substituted 2,2′-bipyridines and 2,2′-biquinoline, 27
2,2′-Biquinoline
the effects of conformation and coordination to zinc(II) ions on the luminescence properties of 2,2′-bipyridine, methyl-substituted 2,2′-bipyridines and 2,2′-biquinoline, 27

Chemically induced dynamic nuclear polarization
^1H CIDNP study of the photoinduced electron transfer reaction between *trans*-stilbene and triethylamine, 221
Chloroaliphatics
laboratory- and pilot-plant-scale photodegradation of chloroaliphatics in aqueous solution by photocatalytic membranes immobilizing titanium dioxide, 81
CIDNP
deprotonation of aminium cations — a CIDNP study of relative group reactivities, 1

Colour reversion
attempts to photostabilize paper made from high-yield pulp by application of UV screens containing groups to aid their compatibility with cellulose and lignin, 311
Concentration quenching
molecular distribution of photoluminescent $Ru(bpy)_3^{2+}$ dispersed in a polymer film and its distance-dependent concentration quenching, 271
Cupric ions
investigation of photoelectrochemical reduction of cupric ions over TiO_2 in the presence of methanol, 195
Cyanine dyes
origin of the high-energy emission of 1,1′-diethyl-2,2′-cyanine dye, 245

Degradation
photocatalytic degradation of 4-chlorophenol mediated by TiO_2: a comparative study of the activity of laboratory made and commercial TiO_2 samples, 305
Deprotonation
deprotonation of aminium cations — a CIDNP study of relative group reactivities, 1
Dialkylaniline
dual fluorescence of ester derivatives of dialkylaniline in polymer matrices: a time-resolved fluorescence study using picosecond dye laser pulses as excitation source, 207
Diffuse reflectance laser flash photolysis
insoluble polymeric benzophenone: surface photophysical studies using diffuse-reflectance laser-flash photolysis (DRLFP), 279
2,5-Dihydroxybenzoic acid
is the oxidation of salicylic acid to 2,5-dihydroxybenzoic acid a specific reaction of singlet oxygen?, 151
Dual fluorescence
dual fluorescence of ester derivatives of dialkylaniline in polymer matrices: a time-resolved fluorescence study using picosecond dye laser pulses as excitation source, 207
Dyes
photochemistry of an unsymmetrical polymethine-cyanine dye; solute–solvent interactions and relaxation dynamics of LDS 751, 45
the effect of pressure on the luminescence of the flexible dye molecule 6-amino-coumarin in four solid polymeric media, 203
reduction of triphenyl methane dyes by the diphenyl ketyl radical and hydrated electrons: a time-resolved study, 237

Electron donors
quenching of TICT fluorescence by electron donors, 33
Electron transfer
^1H CIDNP study of the photoinduced electron transfer reaction between *trans*-stilbene and triethylamine, 221
Electron transfer quenching
re-evaluation of the solvent cage model for electron transfer quenching of the MLCT excited states of Ru(II) complexes, 95

Elsevier Science S.A.

Electrostatic factors
influence of electrostatic factors and interactions with solvent on the rate of excited state proton transfer for 2-naphthol derivatives bound covalently to selected sites of proteins, 143
Environment
UV photolytic degradation of phenylmercury compounds in water–acetonitrile (1:1) media, 299
Ester derivatives
dual fluorescence of ester derivatives of dialkylaniline in polymer matrices: a time-resolved fluorescence study using picosecond dye laser pulses as excitation source, 207
Ethylbromide
fluence and pressure effects on IR multiphoton dissociation of ethylbromide, 105
Evacuation temperature
photophysical processes of pyrene adsorbed onto porous glasses. Importance of evacuation temperature, 283
Exciplex system
magnetic field effect and multiplicity of conformation in a polymer-linked exciplex system, 265
Excited singlet state
study of solvent dependence and kinetics of proton transfer reactions of 3-hydroxybiphenyl in the excited singlet state, 13
Excited states
steady state and time-resolved studies on the redox behaviour of 1,8-naphthalimide in the excited state, 19
re-evaluation of the solvent cage model for electron transfer quenching of the MLCT excited states of Ru(II) complexes, 95
excited state acidity of bifunctional molecules. 4: General solution of lifetimes in systems with three coupled species, 139
Excited state proton transfer
influence of electrostatic factors and interactions with solvent on the rate of excited state proton transfer for 2-naphthol derivatives bound covalently to selected sites of proteins, 143

Fluorescence
quenching fluorescence of Safranine T by inorganic ions in aqueous and non-ionic micellar media, 39
effect of humidity on the dynamic fluorescence properties of aminonaphthalenesulphonate derivatives in a hydrophilic polymer film, 89
photophysical processes of pyrene adsorbed onto porous glasses. Importance of evacuation temperature, 283
Fluorescence emission
squaraine chemistry: effects of solvent and temperature on the fluorescence emission of squaraines, 123
Fluorescent exciplexes
styrylpyridine–amine exciplexes: substituent effects, 161
Fluorosulphate radical
absorption coefficients for the fluorosulphate radical, 101

High-energy emission
origin of the high-energy emission of 1,1′-diethyl-2,2′-cyanine dye, 245
Humic acid
photochemical behaviour of a humic acid synthesized from phenol, 69
3-Hydroxybiphenyl
study of solvent dependence and kinetics of proton transfer reactions of 3-hydroxybiphenyl in the excited singlet state, 13

Intermediate relays
metallic complexes as intermediates in homogeneously and heterogeneously photocatalysed reactions, 57
IR multiphoton dissociation
fluence and pressure effects on IR multiphoton dissociation of ethylbromide, 105
Iron(III)
photoredox properties of iron(III) complexes containing γ-pyranones, 173
N-Isopropylmorpholine
photoinitiation of acrylate polymerization by 2-methyl-1-[4-(methylthio)phenyl]-2-morpholino-propan-1-one: some effects of the morpholino substituent, 291
Isotope effect
1,2-H shift in benzylchlorocarbene: isotope effect and influence of the solvent, 133

Ketones
photochemistry of anthryl-substituted ketones and their use as novel initiators to produce end-capped vinyl polymers, 213
photolysis of ketones in oxygen-saturated micellar solution: oxygen scavenging of *C*-centered radicals in microheterogeneous media, 249

Laser flash photolysis
insoluble polymeric benzophenone: surface photophysical studies using diffuse-reflectance laser-flash photolysis (DRLFP), 279
Ligands
geminate recombination in the ligand field photochemistry of pentacyanoferrate(II) complexes with 1,2-diaminoethane and 1,3-diaminopropane, 177
Luminescence
the effect of pressure on the luminescence of the flexible dye molecule 6-amino-coumarin in four solid polymeric media, 203

Magnetic field effect
magnetic field effect and multiplicity of conformation in a polymer-linked exciplex system, 265
Methanol
investigation of photoelectrochemical reduction of cupric ions over TiO_2 in the presence of methanol, 195
Methyl-substituted 2,2′-bipyridine
the effects of conformation and coordination to zinc(II) ions on the luminescence properties of 2,2′-bipyridine, methyl-substituted 2,2′-bipyridines and 2,2′-biquinoline, 27
Microenvironment
effect of humidity on the dynamic fluorescence properties of aminonaphthalenesulphonate derivatives in a hydrophilic polymer film, 89
Molecular distribution
molecular distribution of photoluminescent $Ru(bpy)_3^{2+}$ dispersed in a polymer film and its distance-dependent concentration quenching, 271
Molecular orbits
photochromism of 3-(3-pyridyl)sydnone: an investigation by electron spectroscopy for chemical analysis (ESCA) and molecular orbital calculations, 257
$[MoOCl(dppe)_2]^+Cl^-$
photocatalytic reduction of acetylene by $[MoOCl(dppe)_2]^+Cl^-$ on TiO_2, 73

1,8-Naphthalimide
steady state and time-resolved studies on the redox behaviour of 1,8-naphthalimide in the excited state, 19
2-Naphthol derivatives
influence of electrostatic factors and interactions with solvent on the rate of excited state proton transfer for 2-naphthol derivatives bound covalently to selected sites of proteins, 143
1-(1-Naphthoxy)anthraquinone
photochromism of 1-(1-naphthoxy)anthraquinones, 167

Oligocarboxylic acid
comparison of the photocatalytic efficiency of TiO_2, iron oxides and mixed Ti(IV)–Fe(III) oxides: photodegradation of oligocarboxylic acids, 183
Oxidation
is the oxidation of salicylic acid to 2,5-dihydroxybenzoic acid a specific reaction of singlet oxygen?, 151
Oxygen scavenging
photolysis of ketones in oxygen-saturated micellar solution: oxygen scavenging of *C*-centered radicals in microheterogeneous media, 249

Pentacyanoferrate(II) complexes
geminate recombination in the ligand field photochemistry of pentacyanoferrate(II) complexes with 1,2-diaminoethane and 1,3-diaminopropane, 177
Phenol
photochemical behaviour of a humic acid synthesized from phenol, 69
Phenylmercury compounds
UV photolytic degradation of phenylmercury compounds in water–acetonitrile (1:1) media, 299
Photocatalysis
photocatalytic degradation of 4-chlorophenol mediated by TiO_2: a comparative study of the activity of laboratory made and commercial TiO_2 samples, 305
Photocatalytic efficiency
comparison of the photocatalytic efficiency of TiO_2, iron oxides and mixed Ti(IV)–Fe(III) oxides: photodegradation of oligocarboxylic acids, 183
Photocatalytic membranes
laboratory- and pilot-plant-scale photodegradation of chloroaliphatics in aqueous solution by photocatalytic membranes immobilizing titanium dioxide, 81
Photocatalytic reduction
photocatalytic reduction of acetylene by $[MoOCl(dppe)_2]^+Cl^-$ on TiO_2, 73
Photochromism
photochromism of 1-(1-naphthoxy)anthraquinones, 167
photochromism of 3-(3-pyridyl)sydnone: an investigation by electron spectroscopy for chemical analysis (ESCA) and molecular orbital calculations, 257
Photodegradation
laboratory- and pilot-plant-scale photodegradation of chloroaliphatics in aqueous solution by photocatalytic membranes immobilizing titanium dioxide, 81
comparison of the photocatalytic efficiency of TiO_2, iron oxides and mixed Ti(IV)–Fe(III) oxides: photodegradation of oligocarboxylic acids, 183
UV photolytic degradation of phenylmercury compounds in water–acetonitrile (1:1) media, 299
Photoelectrochemical reduction
investigation of photoelectrochemical reduction of cupric ions over TiO_2 in the presence of methanol, 195
Photoinduced electron transfer
photoinduced electron transfer in zinc porphyrin–crown ether supramolecule with Eu^{3+} electron acceptor in crown void, 233
Photoinitiation
photoinitiation of acrylate polymerization by 2-methyl-1-[4-(methylthio)phenyl]-2-morpholino-propan-1-one: some effects of the morpholino substituent, 291
Photoluminescence
molecular distribution of photoluminescent $Ru(bpy)_3^{2+}$ dispersed in a polymer film and its distance-dependent concentration quenching, 271
Photolysis
photochemistry of anthryl-substituted ketones and their use as novel initiators to produce end-capped vinyl polymers, 213
photolysis of ketones in oxygen-saturated micellar solution: oxygen scavenging of *C*-centered radicals in microheterogeneous media, 249
Photo-oxidation
metallic complexes as intermediates in homogeneously and heterogeneously photocatalysed reactions, 57
photo-oxidation of 2,4,6-trimethylphenol in aqueous laboratory solutions and natural waters: kinetics of reaction with singlet oxygen, 153
Photophysical process
photophysical processes of pyrene adsorbed onto porous glasses. Importance of evacuation temperature, 283
Photoreceivers
metallic complexes as intermediates in homogeneously and heterogeneously photocatalysed reactions, 57
Photoredox
photoredox properties of iron(III) complexes containing γ-pyranones, 173
Photostabilisation
attempts to photostabilize paper made from high-yield pulp by application of UV screens containing groups to aid their compatibility with cellulose and lignin, 311
Photoyellowing
the use of alkyl cinnamates as UV screens for preventing the photo-yellowing of lignin-rich pulps, 317
Picosecond dye laser
dual fluorescence of ester derivatives of dialkylaniline in polymer matrices: a time-resolved fluorescence study using picosecond dye laser pulses as excitation source, 207
Polymer film
molecular distribution of photoluminescent $Ru(bpy)_3^{2+}$ dispersed in a polymer film and its distance-dependent concentration quenching, 271
Polymethine–cyanine
photochemistry of an unsymmetrical polymethine-cyanine dye; solute–solvent interactions and relaxation dynamics of LDS 751, 45
Polystyrene
magnetic field effect and multiplicity of conformation in a polymer-linked exciplex system, 265
Porous glass
photophysical processes of pyrene adsorbed onto porous glasses. Importance of evacuation temperature, 283
Proton dissociation
excited state acidity of bifunctional molecules. 4: General solution of lifetimes in systems with three coupled species, 139

Proton transfer
study of solvent dependence and kinetics of proton transfer reactions of 3-hydroxybiphenyl in the excited singlet state, 13
Py–DMA system
magnetic field effect and multiplicity of conformation in a polymer-linked exciplex system, 265
γ-Pyranones
photoredox properties of iron(III) complexes containing γ-pyranones, 173
Pyrene
photophysical processes of pyrene adsorbed onto porous glasses. Importance of evacuation temperature, 283

Quenching
quenching of TICT fluorescence by electron donors, 33
quenching fluorescence of Safranine T by inorganic ions in aqueous and non-ionic micellar media, 39

Radicals
photolysis of ketones in oxygen-saturated micellar solution: oxygen scavenging of *C*-centered radicals in micro-heterogeneous media, 249
Recombination
geminate recombination in the ligand field photochemistry of pentacyanoferrate(II) complexes with 1,2-diamino-ethane and 1,3-diaminopropane, 177
Redox
steady state and time-resolved studies on the redox behaviour of 1,8-naphthalimide in the excited state, 19
Reduction
reduction of triphenyl methane dyes by the diphenyl ketyl radical and hydrated electrons: a time-resolved study, 237
Relaxation dynamics
photochemistry of an unsymmetrical polymethine-cyanine dye; solute–solvent interactions and relaxation dynamics of LDS 751, 45
Ru(II) complexes
re-evaluation of the solvent cage model for electron transfer quenching of the MLCT excited states of Ru(II) complexes, 95

Safranine T
quenching fluorescence of Safranine T by inorganic ions in aqueous and non-ionic micellar media, 39
Salicylic acid
is the oxidation of salicylic acid to 2,5-dihydroxybenzoic acid a specific reaction of singlet oxygen?, 151
Singlet oxygen
is the oxidation of salicylic acid to 2,5-dihydroxybenzoic acid a specific reaction of singlet oxygen?, 151
photo-oxidation of 2,4,6-trimethylphenol in aqueous laboratory solutions and natural waters: kinetics of reaction with singlet oxygen, 153
Solid polymeric
the effect of pressure on the luminescence of the flexible dye molecule 6-amino-coumarin in four solid polymeric media, 203
Solute–solvent interactions
photochemistry of an unsymmetrical polymethine-cyanine dye; solute–solvent interactions and relaxation dynamics of LDS 751, 45
Solvent cage model
re-evaluation of the solvent cage model for electron transfer quenching of the MLCT excited states of Ru(II) complexes, 95
Solvents
1,2-H shift in benzylchlorocarbene: isotope effect and influence of the solvent, 133
Squaraines
squaraine chemistry: effects of solvent and temperature on the fluorescence emission of squaraines, 123
Stilbene
^{1}H CIDNP study of the photoinduced electron transfer reaction between *trans*-stilbene and triethylamine, 221
Styrylpyridine–amine exciplexes
styrylpyridine–amine exciplexes: substituent effects, 161
Surface fractal dimension
photophysical processes of pyrene adsorbed onto porous glasses. Importance of evacuation temperature, 283
Sydnone
photochromism of 3-(3-pyridyl)sydnone: an investigation by electron spectroscopy for chemical analysis (ESCA) and molecular orbital calculations, 257

TICT Fluorescence
quenching of TICT fluorescence by electron donors, 33
TiO_2
photocatalytic reduction of acetylene by $[MoOCl(dppe)_2]^+Cl^-$ on TiO_2, 73
investigation of photoelectrochemical reduction of cupric ions over TiO_2 in the presence of methanol, 195
Titanium dioxide
laboratory- and pilot-plant-scale photodegradation of chloroaliphatics in aqueous solution by photocatalytic membranes immobilizing titanium dioxide, 81
photocatalytic degradation of 4-chlorophenol mediated by TiO_2: a comparative study of the activity of laboratory made and commercial TiO_2 samples, 305
Triethylamine
^{1}H CIDNP study of the photoinduced electron transfer reaction between *trans*-stilbene and triethylamine, 221
2,4,6-Trimethylphenol
photo-oxidation of 2,4,6-trimethylphenol in aqueous laboratory solutions and natural waters: kinetics of reaction with singlet oxygen, 153
Triphenyl methane
reduction of triphenyl methane dyes by the diphenyl ketyl radical and hydrated electrons: a time-resolved study, 237

UV irradiation
^{1}H CIDNP study of the photoinduced electron transfer reaction between *trans*-stilbene and triethylamine, 221
UV screens
attempts to photostabilize paper made from high-yield pulp by application of UV screens containing groups to aid their compatibility with cellulose and lignin, 311
the use of alkyl cinnamates as UV screens for preventing the photo-yellowing of lignin-rich pulps, 317

Vinyl polymers
photochemistry of anthryl-substituted ketones and their use as novel initiators to produce end-capped vinyl polymers, 213

Zinc porphyrin–crown ether supramolecule
photoinduced electron transfer in zinc porphyrin–crown ether supramolecule with Eu^{3+} electron acceptor in crown void, 233
